SELECTION OF "AT" PRODUCTS

To select the different AT products suitable for each make and type of engine, our catalogue provides a

most completed information, whose detail is the following:

				Type				
1	2	3	4	5	6	7	8	
Manufacturer line								

Column (1):

- Engine type
- Vehicle type — Years of manufacture
- Engine technical characteristics and vehicle types.

Column (2):

- Piston reference
- Nominal bore in millimeters (and in inches if necessary).
- Quantity
- Piston shape shown by means of a sketch.
- Raw piston.

Column (3):

- Compression height
- \times
- Piston overall length in millimeters (and in inches if necessary).
- Compression heights vary on some type of engines according to the oversizes; the amount shown on the catalogue, corresponds to the standard diameter. In this case "VC" will be stated in column (4).

Column (4):

- Main piston features. They will be indicated by means of following abbreviations:
- Hard anodized piston crown. **A**
- ALMADUR: Special expansion - regulating piston. (Registered Mark). **ALM**
- AT-MATIC: Special expansion - regulating piston, mainly applicable to 4 stroke petrol engines. (Registered Mark). **ATM**
- CINTURAT: Special expansion - regulating piston. (Registered Mark). **CIN**
- Piston with cooling gallery. **G**
- Hipereutectic alloy. **H**
- INSERT: Austenitic iron insert bonded in the first ring groove. **IN**
- INSERT 2: Double insert in austenitic iron bonded in first and second groove. **IN2**
- Steel plate inserted in piston crown to avoid ignition damages. **P**
- Steel rail inserted in the first ring groove. **R**
- Variation in compression height for oversizes. **VC**
- Piston with piston pin bushings. **CB**

Column (5):

- Pin diameter
- \times
- Gudgeon pin length
- In millimeters (and in inches if necessary). When pin is anchored in the conrod, letter **F** will be stated.

Column (6):

- Ring quantity, type and height in millimeters (and in inches, if necessary). Ring types are shown at the beginning of this catalogue. Where the ring type is followed by an apostrophe ('), it means that it deals with a special material.
- Liner shape. If the correspondent liner sketch is not drawn beside the letters showing the liner dimensions, previous sketch is to be applied.

Column (7):

- Nominal size and oversizes for pistons and piston rings, in millimeters (and in inches if necessary).
- Special features of the liner. They are shown by means of the following abbreviations:
- Nitrided liner. **N**
- Special material with high carbon content. **C**
- Liner with hard chromium plated bore. **CR**
- Cylinder liner reference and dimensions.
- A** = outside diameter.
- L** = overall length.
- C** = flange diameter.
- H+F** = flange overall width, where
- H** = flange width
- F** = gasket protection spigot height.

Column (8):

- Ring set reference.
- Complete Piston reference.
- Kit Set reference.
